

BRAKE BLEEDER ●BRAKE BLEEDER PAT.P.

Replacing brake oil **6**

Continuous smooth feeding without pausing! Applicable to ABC Models. Quick One-man Operation!

Purpose

- Replacing brake oil and supplying of brake oil during air-removing.

Application

- Applicable to reserve tanks (inner diameter of inlet: φ18-76) for mini cars and compact cars to small trucks (2t).

Features

- Continuous feeling (pressured) shortens work time
- Compact design: simple, low cost, but high performance.
- Easy to operate for air-driven method.
- One touch on the button enables air-removing of the tank.
- Plate rubber adopted for attachment by one action (see attachment A1).
- Expansion rubber with inner pressure ensures excellent contact (see attachments A2, B1 and B2).
- Special attachment enables quick installation (see attachments G1, G2, F1, F2 and H1).

●BRAKE BLEEDER

No. ABX70	kg 8.5
Brake bleeder main body (with dust-proof cover),	L320×W205×H210 Tank Capacity2 ℓ Feeding Hose 3.5m
Attachment Set	Attachment A1 ABX70-A1
	Attachment A2 ABX70-A2
	Attachment B1 ABX70-B1
	Attachment B2 ABX70-B2
	Clamp D1 (Claw) ABX70-D1
	Clamp E1 (Chain) ABX70-E1
	Attachment Case Plastic case

● How to Use Brake Bleeder

1 Equip the attachment on the reservoir tank.

Remove the reservoir tank cap and equip the appropriate attachment on the tank.

2 Connect hoses.

Connect the transport hose coupler with attachment and air coupler with brake bleeder.

3 Transport brake liquid.

Switch the operation lever to "Transport" and transport brake liquid, replace brake liquid, or relieve air.
