

LOCTITE

Product	Color	Maximum Durable Temperature	Quantity		
YCE-601	Green (high strength)	150°	50ml	10	
-648	Green (high-resistant)	175°	50ml	10	

• This anaerobic bonding agent enters into the gaps found on metallic objects, such as on screws and shafts, and hardens once cut off from air. As this agent is a single liquid, the administering process is simplified saving time and cost.

Usage

- For holding engaging parts, such as bearings or splines.
- Main component : Anaerobic resin.

*LOCTITE is the registered trademark of Henkel.

● **LOCTITE (TIGHTENS JOINTS)**

LOCTITE

LOCTITE

Product	Color	Quantity		
YCD-242	Blue (medium strength)	50ml	10	
-262	Red (high strength)	50ml	10	

• This anaerobic bonding agent enters into the gaps found on metallic objects, such as on screws and shafts, and hardens once cut off from air. As this agent is a single liquid, the administering process is simplified saving time and cost.

Usage

- To prevent loosening as well as to help seal differential gear bolts, flywheel bolts and oil pan bolts, etc.
- Main component : Anaerobic resin.

*LOCTITE is the registered trademark of Henkel.

● **LOCTITE (PREVENTS LOOSENING OF SCREWS)**

LOCTITE

LOCTITE

No.	Color	Quantity		
YCF-5651	White	250ml	10	

• This anaerobic bonding agent enters into the gaps found on metallic objects, such as on screws and shafts, and hardens once cut off from air. As this agent is a single liquid, the administering process is simplified saving time and cost.

• One step sealant for metallic pipes. The administering of Teflon to screw parts prevents biting.

Usage

- Seals the screw joints of sprinklers, hydraulic pipes, and other piping.
- Main component : Anaerobic resin.

*LOCTITE is the registered trademark of Henkel.

● **LOCTITE (SEALANT FOR PIPES)**

LOCTITE

PRIMER

No.	Color	Quantity		
YCK-7471	Yellow (for general use)	180ml	12	
-7649	Green (for flanges, etc.)	180ml	12	

- An accelerator used for anaerobic adhesive and anaerobic sealant.
- Use No. YCK-7649 if faster hardening is required.
- Spray type
- For cleaning bonding surfaces & peeling off gaskets
- For use on anaerobic adhesives

*LOCTITE is the registered trademark of Henkel.

● **PRIMER (Solidification Accelerator)**

LOCTITE

BRAKE & PARTS CLEANER

No.	Type	Color	Quantity		
YCA-480A	Medium drying speed	Colorless and transparent	480ml	12	
-480B	Fast drying	Colorless and transparent	480ml	12	

- General cleaner for brake devices and other automotive parts, etc.
- Gentle on the environment-Non-chlorofluorocarbon, non-chlorine type solvent.
- Spray type.

*LOCTITE is the registered trademark of Henkel.

● **BRAKE & PARTS CLEANER**

LOCTITE

ORANGE HAND CLEANER

No.	Quantity			
YCH-40	Pump Type	4 ℓ	4	

- For removing all kinds of dirt and grime from hands
- Non-oil-base, natural hand cleaner, made from oranges and other natural ingredients.

● **ORANGE CLEANER (CONTAINS FINE PARTICLES)**

LOCTITE
